Presentation-ready spec for PPT slides

UniFlow University Portal Dashboard

github.com/mangiai/studentwise-dash

June 15, 2026

1. Executive Summary

UniFlow is a full-stack university portal that lets students, teachers, and staff manage courses, attendance, fees, grades, and notifications from a single dashboard. The app is built with **React 19 + TanStack Start**, deployed on **Vercel**, and backed by **Supabase Postgres** with Row Level Security (RLS) and Realtime subscriptions.

Attribute	Value
Product name	UniFlow
Tagline	University Portal
Package name	studentwise-dash
Local dev URL	http://localhost:3000
Production URL	https://studentwise-dash.vercel.app (configure in Vercel)
GitHub	https://github.com/mangiai/studentwise-dash
Source files	~103 TypeScript/TSX files (~12,400 lines)
Total commits	28 (sprint: June 10–15, 2026)

2. Problem Statement & Goals

Problem

Universities need a centralized digital portal where students can track academic progress, fees, and attendance; teachers can view analytics; and staff can manage enrollment data — without juggling multiple disconnected systems.

Goals Achieved

- Role-based portal for **students, teachers, admins, and moderators**
- Live data from Supabase (not static mock data)
- Secure authentication with session cookies (SSR-compatible)
- Staff CRUD for students, teachers, courses, enrollments, attendance, fees, and notifications
- Session-level attendance tracking with auto-synced summaries
- Real-time UI updates via Supabase Realtime
- Production deployment on Vercel with Nitro serverless functions
- Demo-ready seed data and test accounts for presentations

3. Technology Stack

Frontend

Technology	Version	Purpose
React	19.2	UI framework
TanStack Router	1.168	File-based routing
TanStack Start	1.167	Full-stack React framework (SSR + server functions)
TanStack React Query	5.83	Server state / data fetching
Tailwind CSS	4.2	Utility-first styling
shadcn/ui + Radix UI	Latest	Accessible component library (40+ UI primitives)
Recharts	2.15	Dashboard charts and analytics
Lucide React	0.575	Icon set
React Hook Form + Zod	7.71 / 3.24	Form validation
Sonner	2.0	Toast notifications
date-fns	4.1	Date formatting

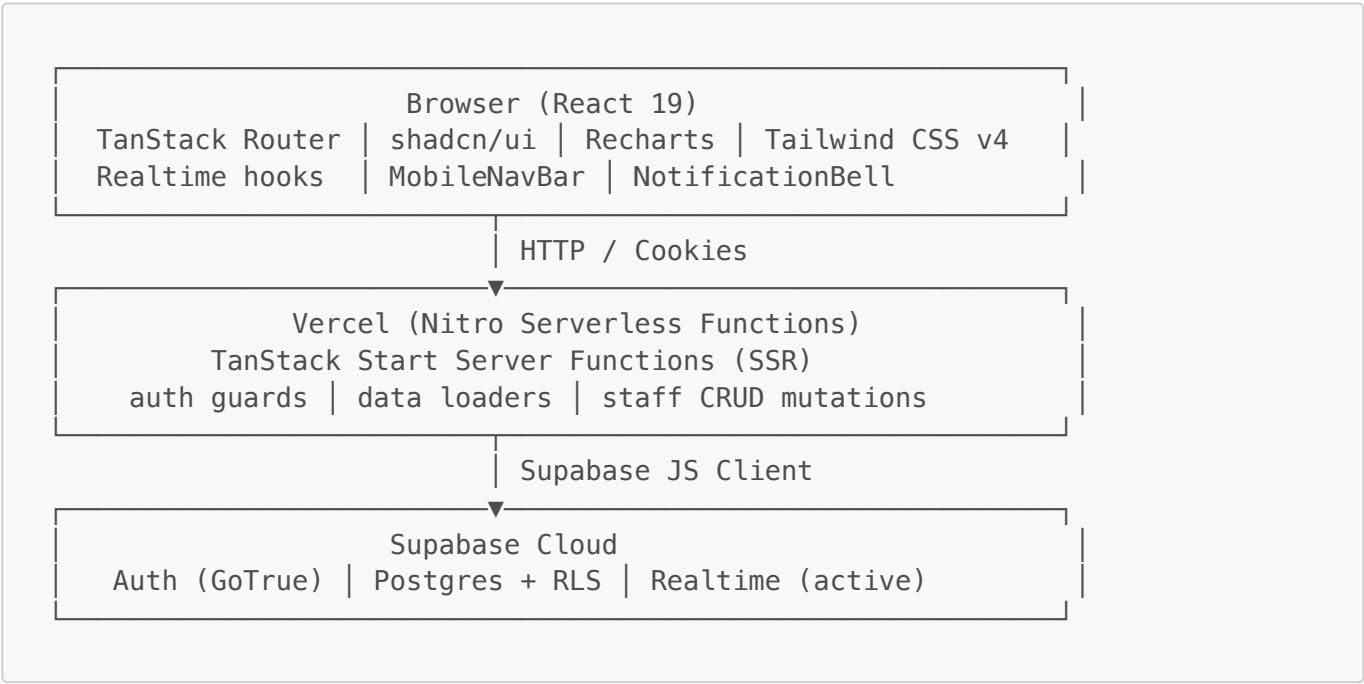

Backend & Database

Technology	Purpose
Supabase Postgres	Primary database
Supabase Auth	Email/password authentication
@supabase/ssr	Cookie-based sessions for SSR
Row Level Security (RLS)	Per-role data access policies
Supabase Realtime	Live invalidation on enrollments, fees, grades, attendance, notifications
pgcrypto	Password hashing for seed users

Build, Deploy & Tooling

Technology	Purpose
Vite	7.3 — Dev server and bundler
Nitro	3.0 — Serverless preset for Vercel
Node.js	22.x — Runtime (local + Vercel functions)
TypeScript	5.8 — Type safety
ESLint + Prettier	Code quality
Supabase CLI	Migrations, local DB, type generation

Architecture Diagram

4. User Roles & Access Control

Role	Login URL	Access
Student	<code>/login</code>	Dashboard, courses, attendance, fees, teachers, results, notifications, settings
Teacher	<code>/login</code>	All student pages + Reports & Analytics
Admin	<code>/admin/login</code>	Full staff portal — CRUD + delete permissions
Moderator	<code>/admin/login</code>	Staff portal — CRUD without delete

Staff vs Admin

- **Staff** = `admin` or `moderator` (shared staff portal at `/admin/*`)
- **Moderators** can create and edit records but cannot delete students, teachers, or courses
- Enforced in UI via `useStaffPermissions()` and in RLS via `is_staff()` / `is_admin()` helpers

Auth Guards

- `requireAuth` — redirects unauthenticated users to `/login`
- `requireGuest` — redirects signed-in users away from login/signup
- `requireStaff` — restricts staff routes to `admin` or `moderator`
- `requireStaffGuest` — staff login page guard (redirects signed-in staff to `/admin/dashboard`)

Session Model

- Supabase Auth with **HTTP cookies** via `@supabase/ssr`
- Profile auto-created on signup via Postgres trigger (`handle_new_user`)
- Role stored in `auth.users.raw_app_meta_data.role` and `profiles.role`

5. Feature Map — All Routes & Links

Replace `{BASE_URL}` with `http://localhost:3000` (local) or your Vercel production URL.

5.1 Public / Auth Routes

Feature	Route	Link	Description
Home redirect	/	{BASE_URL}/	Redirects to <code>/dashboard</code> if logged in, else <code>/login</code>
Student/Teacher Login	/login	{BASE_URL}/login	Email + password sign-in
Staff Login	/admin/login	{BASE_URL}/admin/login	Admin & moderator portal entry
Sign Up	/signup	{BASE_URL}/signup	New student registration + student ID linking

5.2 Student & Shared Portal Routes

Feature	Route	Link	Roles	Live Data
Dashboard	/dashboard	{BASE_URL}/dashboard	Student, Teacher, Admin	✔ Stats, charts, GPA, attendance overview
My Courses	/courses	{BASE_URL}/courses	Student, Teacher, Admin	✔ Enrollments, credits, attendance badges
Attendance	/attendance	{BASE_URL}/attendance	Student, Teacher, Admin	✔ Per-course %, ring charts, short-attendance alerts
Fee Management	/fees	{BASE_URL}/fees	Student, Admin	✔ Semester balance, payment history, fee challan (PKR)
Faculty Directory	/teachers	{BASE_URL}/teachers	Student, Teacher, Admin	✔ Teacher cards from database
Academic Results	/results	{BASE_URL}/results	Student, Teacher, Admin	✔ Semester grades, CGPA, grade badges
Notifications	/notifications	{BASE_URL}/notifications	Student, Teacher, Admin	✔ Fee, attendance, course, announcement alerts

Feature	Route	Link	Roles	Live Data
Settings	/settings	{BASE_URL}/settings	Student, Teacher, Admin	✔ Profile, notification prefs, password change (persisted)

5.3 Teacher & Admin Analytics

Feature	Route	Link	Roles	Live Data
Reports & Analytics	/reports	{BASE_URL}/reports	Teacher, Admin	✔ Enrollment trends, fee status, attendance, department charts

5.4 Staff Portal (Admin & Moderator)

Feature	Route	Link	Roles	Live Data
Overview	/admin/dashboard	{BASE_URL}/admin/dashboard	Staff	✔ Summary stats and quick links
Students	/admin/students	{BASE_URL}/admin/students	Staff	✔ Create / edit students (delete: admin only)
Teachers	/admin/teachers	{BASE_URL}/admin/teachers	Staff	✔ Create / edit teachers (delete: admin only)
Courses	/admin/courses	{BASE_URL}/admin/courses	Staff	✔ Create / edit courses, assign instructors
Enrollments	/admin/enrollments	{BASE_URL}/admin/enrollments	Staff	✔ Enroll / unenroll students in courses
Attendance	/admin/attendance	{BASE_URL}/admin/attendance	Staff	✔ Mark per-session attendance (Fall 2026 term)

Feature	Route	Link	Roles	Live Data
Fees & Challans	/admin/fees	{BASE_URL}/admin/fees	Staff	✓ Regenerate challans, update fee status
Notifications	/admin/notifications	{BASE_URL}/admin/notifications	Staff	✓ Create and broadcast user notifications

Staff capabilities:

- Create / edit **students, teachers, courses**
- **Enroll / unenroll** students in courses
- **Assign instructors** to courses
- **Mark session attendance** per student per class date
- **Manage fee challans** — regenerate and update Paid / Pending / Overdue
- **Send notifications** to individual users
- **Upsert grades** for students
- Search and filter across all entities
- **Delete** operations restricted to **admin** role only

5.5 Sidebar Navigation (Role-Filtered)

Student portal (AppLayout.tsx):

Nav Item	Route	Student	Teacher	Admin
Dashboard	/dashboard	✓	✓	✓
My Courses	/courses	✓	✓	✓
Attendance	/attendance	✓	✓	✓
Fee Management	/fees	✓	—	✓
Teachers	/teachers	✓	✓	✓
Results	/results	✓	✓	✓
Reports	/reports	—	✓	✓
Notifications	/notifications	✓	✓	✓
Settings	/settings	✓	✓	✓

Staff portal (AdminLayout.tsx):

Nav Item	Route	Admin	Moderator
Overview	/admin/dashboard	✓	✓

Nav Item	Route	Admin	Moderator
Students	/admin/students		
Teachers	/admin/teachers		
Courses	/admin/courses		
Enrollments	/admin/enrollments		
Attendance	/admin/attendance		
Fees & Challans	/admin/fees		
Notifications	/admin/notifications		

Moderators use the same staff portal but delete buttons are hidden. Mobile bottom nav is available on student portal pages.

6. Test Users & Demo Credentials

Universal Password

StudentWise123!

Portal Login — /login

Email	Role	Display Name	Linked Record	Best For Demo
sarah@studentwise.test	student	Sarah Ahmed	Student 2026-BSCS-0042	Primary student demo — 6 courses, grades, fees, notifications
hassan@studentwise.test	student	Hassan Raza	Student 2026-BSCS-0043	Pending fees, low attendance scenario
maryam@studentwise.test	student	Maryam Khan	Student 2025-BSEE-0118	EE department, paid fees
teacher@studentwise.test	teacher	Dr. Aamir Khan	Teacher FAC-2018-014	Teacher demo — Reports page

Staff Login — /admin/login

Email	Role	Display Name	Best For Demo
admin@studentwise.test	admin	Portal Admin	Full staff demo — CRUD + delete

Email	Role	Display Name	Best For Demo
moderator@studentwise.test	moderator	Portal Moderator	Limited staff demo — CRUD without delete

Per-User Demo Highlights

Sarah Ahmed (sarah@studentwise.test)

- 6 enrolled courses: CS-304, CS-307, CS-401, CS-403, CS-411, MATH-204
- Real attendance records (e.g., OS at 68% — short attendance alert)
- Fee history + Spring 2026 semester balance (PKR)
- Grades for Fall 2025 and Spring 2025
- 4 notifications (2 unread)

Hassan Raza (hassan@studentwise.test)

- Fee status: Pending
- 3 enrolled courses
- Lower attendance on Operating Systems

Maryam Khan (maryam@studentwise.test)

- Electrical Engineering (BSEE)
- Paid fees, Software Engineering enrollment

Dr. Aamir Khan (teacher@studentwise.test)

- CS faculty, 3 courses
- Access to Reports & Analytics with live charts

Portal Admin (admin@studentwise.test)

- Full staff portal at /admin/dashboard
- CRUD students, teachers, courses, attendance, fees (persisted to Supabase)

Portal Moderator (moderator@studentwise.test)

- Same staff portal as admin
- Can edit records but cannot delete students, teachers, or courses

7. Database Schema

Tables (13 total)

Table	Description
departments	CS, EE, BBA, MATH
profiles	User profiles linked to auth.users (includes notification prefs)
students	Student records (ID, GPA, credits, fee status)

Table	Description
teachers	Faculty records
courses	Course catalog with instructor assignment
enrollments	Student ↔ course mapping per semester
attendance_records	Auto-calculated attendance % per enrollment (synced from sessions)
class_sessions	Individual class dates/times per course (Fall 2026 term)
session_attendance	Per-session present/absent marks per enrollment
fee_transactions	Payment history (PKR)
semester_fees	Current semester fee balances
course_grades	Semester grades and grade points
notifications	User-specific alerts (fee, attendance, course, announcement)

Profile Notification Columns

- `notify_email` — email notification toggle
- `notify_push` — push notification toggle
- `notify_fee_reminders` — fee reminder toggle

Enums

- `fee_status`: Paid, Pending, Overdue
- `person_status`: Active, Hold, On Leave
- `profiles.role`: student, teacher, admin, moderator

Security

- **RLS enabled** on all public tables
- Students read **own** records only
- Teachers read students, enrollments, attendance (read-only)
- **Staff** (`admin` + `moderator`) have CRUD on all management tables via `is_staff()`
- **Admins** retain elevated delete privileges via `is_admin()` where applicable
- Auto-profile trigger on new auth user signup
- `sync_enrollment_attendance_summary` trigger keeps `attendance_records` in sync with `session_attendance`

Realtime Publications

Tables published to `supabase_realtime`: `enrollments`, `notifications`, `semester_fees`, `course_grades`, `attendance_records`, `class_sessions`, `session_attendance`

Migrations

File	Description
<code>20250610000000_initial_schema.sql</code>	Core schema + RLS policies

File	Description
20250610100000_grades_notifications.sql	Grades, notifications, teacher read policies
20250610200000_moderator_settings_realtime.sql	Moderator role, notification prefs, staff RLS, realtime
20250610300000_moderator_auth_user.sql	Moderator demo auth user
20250610400000_class_sessions_attendance.sql	Session-level attendance + summary sync trigger

Seed Scripts

File / Command	Purpose
supabase/seed.sql	Demo departments, students, courses, enrollments, fees, grades
supabase/seed-cloud-complete.sql	Full cloud seed (recommended for Supabase cloud)
supabase/seed-auth-users.sql	6 test auth users with fixed UUIDs
supabase/seed-fall-attendance.sql	Fall 2026 class sessions + attendance marks
npm run seed:users	Admin API seed script (recommended for cloud)
npm run db:seed:cloud	Push cloud-complete seed via Supabase CLI
npm run db:seed:attendance	Push Fall 2026 attendance calendar

Academic Terms (constants)

Constant	Value
CURRENT_SEMESTER	Spring 2026
ATTENDANCE_TERM	Fall 2026
ATTENDANCE_TERM_START	2026-01-01
ATTENDANCE_TERM_END	2026-06-05

8. Server Functions (API Layer)

All data access goes through TanStack Start server functions in `src/lib/supabase/data.ts`:

Function	Method	Purpose
fetchPortalDashboard	GET	Role-aware dashboard stats and charts
fetchStudentCourses	GET	Enrolled courses with attendance
fetchStudentAttendance	GET	Per-course attendance + summary

Function	Method	Purpose
fetchAdminAttendance	GET	Staff attendance grid (sessions per student/course)
adminUpdateSessionAttendance	POST	Mark present/absent for a class session
fetchStudentFees	GET	Semester fees + transaction history
generateFeeInvoice	GET	Generate fee challan for student
fetchTeachersDirectory	GET	Faculty directory
fetchStudentResults	GET	Grades grouped by semester
fetchNotifications	GET	User notifications
fetchUnreadNotificationCount	GET	Unread notification badge count
markNotificationsRead	POST	Mark all notifications as read
markNotificationRead	POST	Mark single notification as read
fetchReportsData	GET	Analytics for teachers/admins
fetchAdminData	GET	Staff panel summary data
fetchAdminEnrollments	GET	Enrollment list for staff portal
fetchAdminStudentGrades	GET	Grades for a specific student
fetchDepartments	GET	Department list for forms
fetchUserSettings	GET	Profile + notification preferences
updateUserProfile	POST	Save display name
updateNotificationPreferences	POST	Save notification toggles
changeUserPassword	POST	Change account password
adminUpsertStudent	POST	Create/update student
adminDeleteStudent	POST	Delete student (admin only)
adminUpsertTeacher	POST	Create/update teacher
adminDeleteTeacher	POST	Delete teacher (admin only)
adminUpsertCourse	POST	Create/update course
adminDeleteCourse	POST	Delete course (admin only)
adminEnrollStudent	POST	Enroll student in course
adminUnenrollStudent	POST	Remove enrollment
adminAssignInstructor	POST	Assign teacher to course
adminUpsertGrade	POST	Create/update student grade
adminRegenerateChallan	POST	Regenerate fee challan for student
adminUpdateChallanStatus	POST	Update fee status (Paid/Pending/Overdue)

Function	Method	Purpose
adminCreateNotification	POST	Send notification to a user

9. Development Timeline & Effort

Git Commit History

Phase 1 — Foundation & Deploy (June 10, 2026)

#	Commit	Description
1	99f4c4e	Initial commit — University dashboard UI scaffold
2–4	f1a1ca4–095cf4d	Repo setup, Vercel deployment config
5	521a6c1	Removed Lovable branding — custom identity
6	5a70dbe	Auth setup — Supabase login, signup, session cookies
7	6850f09	Admin route — dedicated staff login + dashboard
8–11	ee52777–b2d522b	Live Supabase data, 404 fixes, homepage redirect

Phase 2 — Staff Portal & Features (June 11–15, 2026)

#	Commit	Description
12–16	09d338c–c8d1c35	Env vars, Supabase key setup, build fixes
17	80d66fe	Admin courses — add courses from staff panel
18	e2b7738	Complete seed — cloud-ready demo data
19	c5addf3	New server functions — settings, challans, attendance, notifications
20–24	9ec04db–c8d627a	Attendance fixes, challan fixes, UI polish
25–26	959a816–afadd79	UI updates and polishing
27	fd568e5	Rebranding — StudentWise → UniFlow

Development Effort Summary

Area	Work Completed
UI / UX	10+ portal pages, staff portal with 8 sections, responsive sidebar + mobile nav, Recharts dashboards, role-based navigation
Authentication	Email/password login, signup with student linking, SSR cookie sessions, role guards, separate staff login
Database	5 migrations, 13 tables, RLS policies, triggers, realtime publications, seed data
Backend integration	33 server functions, typed Supabase client, staff CRUD mutations

Area	Work Completed
Realtime	<code>useRealtimeInvalidate</code> hook — live refresh on 5+ tables
Attendance	Session-level tracking, staff marking UI, auto-synced summary records
Fees	Fee challan generation, staff challan management
Settings	Persisted profile, notification prefs, password change
DevOps	Vercel deployment (Nitro preset), env config, <code>db:deploy</code> auto-migrate, Node 22 runtime
Documentation	README, AUTH_SETUP.md, user.md, PROJECT_SPEC.md, seed scripts

Key Milestones (for PPT slides)

1. **Phase 1 — Foundation:** React dashboard UI with shadcn components
2. **Phase 2 — Deploy:** Vercel + Nitro serverless + custom branding
3. **Phase 3 — Auth:** Supabase Auth, profiles, role-based guards
4. **Phase 4 — Staff Portal:** Multi-section admin/moderator management panel
5. **Phase 5 — Live Data:** Supabase Postgres integration on every page
6. **Phase 6 — Attendance & Fees:** Session attendance, challans, realtime sync
7. **Phase 7 — Polish:** UniFlow rebrand, mobile nav, settings persistence, UI polish

10. Deployment & Environment

Vercel Configuration (`vercel.json`)

- Framework: **TanStack Start**
- Build: `npm run build` (optionally preceded by `npm run db:deploy`)
- Node.js **22.x** runtime
- Cache-Control: no-store for HTML, immutable for `/assets/**`

Required Environment Variables

Variable	Scope	Required
<code>VITE_SUPABASE_URL</code>	Browser	✓
<code>VITE_SUPABASE_ANON_KEY</code>	Browser	✓
<code>SUPABASE_URL</code>	Server (SSR)	✓
<code>SUPABASE_ANON_KEY</code>	Server (SSR)	✓
<code>SUPABASE_SERVICE_ROLE_KEY</code>	Server (admin seed, signup linking)	✓

Optional (auto-migrate on deploy)

Variable	Purpose
<code>SUPABASE_ACCESS_TOKEN</code>	Supabase account access token

Variable	Purpose
<code>SUPABASE_DB_PASSWORD</code>	Database password
<code>SUPABASE_PROJECT_REF</code>	Project ref from Supabase URL

NPM Scripts

Command	Description
<code>npm run dev</code>	Dev server at :3000
<code>npm run build</code>	Production build
<code>npm run preview</code>	Preview production build
<code>npm run lint</code>	ESLint
<code>npm run format</code>	Prettier format
<code>npm run db:push</code>	Push migrations to Supabase
<code>npm run db:deploy</code>	Auto-push migrations (Vercel build)
<code>npm run db:reset</code>	Reset local DB with seed
<code>npm run db:types</code>	Regenerate TypeScript types
<code>npm run seed:users</code>	Create test auth users via Admin API
<code>npm run db:seed:cloud</code>	Push full cloud seed
<code>npm run db:seed:attendance</code>	Push Fall 2026 attendance calendar

11. Demo Walkthrough (Suggested PPT Flow)

Slide-friendly demo script

1. **Landing** → Open `{BASE_URL}` → auto-redirect to login
2. **Student view** → Login as `sarah@studentwise.test` / `StudentWise123!`
3. **Dashboard** → Show GPA, attendance chart, course progress (live realtime)
4. **Courses** → 6 enrolled courses with attendance badges
5. **Attendance** → Ring charts, short-attendance warning on OS
6. **Fees** → PKR balance, payment history, download challan
7. **Results** → Semester grades table, CGPA
8. **Notifications** → Unread fee + attendance alerts
9. **Settings** → Update profile name, toggle notification prefs
10. **Logout** → Sign out
11. **Teacher view** → Login as `teacher@studentwise.test` → **Reports** page with charts
12. **Admin view** → Go to `/admin/login` → `admin@studentwise.test` → CRUD a student, mark attendance, update fee status
13. **Moderator view** → Login as `moderator@studentwise.test` → same portal, no delete buttons

12. Project Structure

13. Future Enhancements (Roadmap)

Priority	Feature	Status
High	Fee payment gateway integration	Not started
Medium	PDF export for results / fee receipts	Challan UI exists; PDF export pending
Medium	Email notifications (actual delivery)	Toggle persisted; delivery not wired
Medium	Teacher self-service attendance marking	Staff portal only
Low	Push notifications (browser/mobile)	Preference toggle saved
Low	Bulk attendance import (CSV)	Not started
Low	Multi-semester attendance history	Fall 2026 term only

14. Quick Reference Card (Copy to PPT)

UNIFLOW – UNIVERSITY PORTAL

Stack: React 19 · TanStack Start · Supabase · Vercel
Repo: github.com/mangiai/studentwise-dash
Local: <http://localhost:3000>

TEST USERS (password: StudentWise123!)
Student: sarah@studentwise.test → /login
Teacher: teacher@studentwise.test → /login
Admin: admin@studentwise.test → /admin/login
Moderator: moderator@studentwise.test → /admin/login

KEY ROUTES
/dashboard /courses /attendance /fees /results
/teachers /notifications /reports /settings
/admin/dashboard /admin/students /admin/attendance
/admin/fees /admin/notifications

End of specification document.
